## **Announcement:**

- This will be the new format of the Mariposa. As I promised to the community a couple of years ago, I wanted to bring the Mariposa back to the basics. I wanted to find a more organized and simple way to spread the news of what's going on in the community. So here it is. I tried to make the Mariposa too fancy in the beginning and I had to really hunt for good articles. In the end, getting the news and details that the community really needed to know got out a little too late. Hopefully this will help increase the attendance of the various meetings that go on throughout the month. We need to come together as a community and show our support to the committees that the FCC has. In order for change to happen, we as a community, need to start owning up to what is in front of us.

God Bless,
